# SiSU PostgreSQL

## 1. Postgresql

4

### 1.1 Name

5

SiSU - Structured information, Serialized Units - a document publishing system, postgresql dependency package

6

### 1.2 Description

7

Information related to using postgresql with sisu (and related to the sisu\_postgresql dependency package, which is a dummy package to install dependencies needed for SiSU to populate a postgresql database, this being part of SiSU - man sisu).

8

### 1.3 Synopsis

9

sisu -D [instruction] [filename/wildcard if required]

10

sisu -D -pg -[instruction] [filename/wildcard if required]

11

### 1.4 Commands

12

Mappings to two databases are provided by default, postgresql and sqlite, the same commands are used within sisu to construct and populate databases however -d (lowercase) denotes sqlite and -D (uppercase) denotes postgresql, alternatively -sqlite or -pgsql may be used

13

**-D or -pgsql** may be used interchangeably.

14

#### 1.4.1 create and destroy database

15

**-pgsql -createall**

16

initial step, creates required relations (tables, indexes) in existing (postgresql) database (a database should be created manually and given the same name as working directory, as requested) (rb.dbi)

17    **sisu -D –createdb**

creates database where no database existed before

18    **sisu -D –create**

creates database tables where no database tables existed before

19    **sisu -D –Dropall**

destroys database (including all its content)! kills data and drops tables, indexes and database associated with a given directory (and directories of the same name).

20    **sisu -D –recreate**

destroys existing database and builds a new empty database structure

21    **1.4.2 import and remove documents**

22    **sisu -D –import -v [filename/wildcard]**

populates database with the contents of the file. Imports documents(s) specified to a postgresql database (at an object level).

23    **sisu -D –update -v [filename/wildcard]**

updates file contents in database

24    **sisu -D –remove -v [filename/wildcard]**

removes specified document from postgresql database.
